

Allied Valve Inc.™

ACTUATION Quality Pipeline Actuation Sales and Service

Your location should be our next stop.

- Conversion of manual valves to automated valves
- Control upgrades
- Winterize
- Certified factory-trained technicians
- New installations
- Preventative maintenance service cycles
- Rebuild

Unmatched experience, continuous investments in training and factory certifications make Allied Valve personnel the safe and professional choice for the installation and repair of the valves and actuators you rely on each day. Repair of all makes and types of actuators including: electronic, hydraulic, pneumatic, and gas and oil.

Call on us for scheduled and emergency service, in our shops or at your sites, 24/7/365. We are dedicated to total safety and value for you.

Take advantage of our full, one-year parts and service warranty on every new and repaired valve we sell.

Put the Allied Team to work for you!

Let us apply more than 500 years of combined industry-specific experience to the problems you face each day.

Add your locations to our growing list of manual-to-automated actuation conversions:

Marengo, IL • Birmingham, IA • Wyalusing, PA • London, Ontario • Tunkhannock, PA • Defiance, OH • Owego, NY • Kanawha County, WV • Danville, KY • Washington, PA • Pine Grove, WV • Maquoketa, IA • Carrington, ND • Bronx, NY • Antler, ND • Enderlin, ND • Manchester, IA • Wimbledon, ND • Elwood, IL • Rugby, ND • Esmond, ND • Milnor, ND • Evansville, IN • Fairmount, ND • Valley City, ND • Towner, ND • Bantry, ND • Mantador, ND • Maxbass, ND • Gettysburg, PA • Fessenden, ND

Six nearby Allied Valve locations are available to supply and service your needs.

Our most popular brands assembled, tested, delivered, actuated and maintained include:

BETTIS
Actuators & Controls

Paired with rotary and liner valves, Bettis actuators provide automated control in high pressure gas transmission pipeline applications where no pneumatic or electric supply lines are available. Can be supplied with almost any required control system, including remote control and line break systems.

EIM CONTROLS

Perfect for applications using linear, rising stem or rotating stem valves, this gas-driven actuator is capable of producing up to 900ft/lb of torque. With more than a half century of outstanding field performance around the globe, EIM actuators are well suited for both rotary and linear industrial or pipeline valve applications and are ideal for compressor stations.

Shafer[®]

Rotary vane actuators designed to assure reliable performance, even in severe climate and high vibration pipeline applications. Used to automate ball valves or plug valves for emergency shut down, line break protection, mainline isolation and more. Over 100,000 installed since 1955, most are still in operation.

Certified safe by respected industry experts.

Shafer, Bettis and EIM Controls – Local service provider, factory-trained technicians

EIM Electric – Gold Seal-trained technicians

ValvePro* – trained technicians for pipeline ball, gate and globe valve maintenance
